

LONMARK[®]
INTERNATIONAL

ON-SITE TRAINING

*You provide the facility and the computers;
we provide the expert instructor!*

LONMARK International offers Professional Certification training classes at your company's location and at your convenience. Our comprehensive on-site classes are taught by a LONMARK International certified trainer, and are designed to meet your needs and schedule.

The on-site training class is a preparatory course for professionals wishing to become LONMARK Certified Professionals.

The class is designed as a refresher course for individuals already familiar with the basic concepts of the LONWORKS technology and for those who have had prior training and field experience.

For more information of the on-site training program, please contact LONMARK International at info@lonmark.org or +1 408-938-5266.
