Product Bulletin

LN-PRG203-1, LN-PRG300-1, LN-PRG4x0-1, LN-PRG5x0-1

Code No. LIT-12011317
Software Release 4.1
Issued October 6, 2008
Supersedes November 9, 2007

The LN Series Free Programmable Controllers are microprocessor based free programmable controllers, designed to control various Heating, Ventilating, and Air Conditioning (HVAC) applications.

The Metasys® system LN Series Free Programmable controllers product family is built to meet rigorous quality standards. The complete family of Metasys system LN Series controllers is designed for use with any LONWORKS® network open and interoperable system.

Figure 1: LN-PRG500-1 Controller

Table 1: Features and Benefits

Features	Benefits
Configurable Software	Features an LNS® plug-in that provides the ability to easily configure inputs, outputs, and sequence options. Configured device complies with LONMARK® Space Comfort Control (SCC) profile for interoperability with other LONMARK devices. Also features more than 60 network variables.
Robust Hardware	Features a fire retardant plastic enclosure, a 128k Flash memory for the configuration and trending of up to 12,000 events, and a status indicator on each output.
Powerful Control Options	Allow you to easily configure all features, including, input types, output types, heating and cooling stages, variable airflow, and Proportional plus Integral plus Derivative (PID) loops. The controller supports four input types: space temperature; setpoint adjustment; duct temperature; and occupancy bypass, or window contacts.

LN Series Free Programmable Controllers Overview

You can control equipment such as roof top units, fan coils, heat pumps, ventilator units, and terminal units with the LN Series Free Programmable Controllers (Figure 1). The LN Series Free Programmable Controller line can be programmed using the LN-Free Programming Plug-in or the LN Graphical Programming Interface (GPI) Plug-in with LN-Builder 3.2 software.

LNS LN-Free Programming Plug-in

The LN-Free Programming Plug-in tool is unique in the controls industry because it combines a user-friendly Graphical User Interface (GUI) with the power and flexibility of a code editor and compiler. The LN-Free Programming Plug-in tool uses a simplified version of BASIC that is custom made to suit control requirements.

LNS LN Graphical Programming Interface (GPI) Plug-in

The LN Graphical Programming Interface Plug-in tool is a programming tool that allows for the building of control sequences by dragging and dropping block objects and then linking the objects with a simple click, select, and release. With a user-friendly interface and intuitive programming environment, GPI makes Heating, Ventilating, and Air Conditioning (HVAC) programming easier than ever.

LNS LN-Scheduler Plug-in

The LN-Scheduler plug-in allows you to easily configure a weekly based schedule and a special day schedule for holidays. Easily add and remove the special day event into the calendar by a simple click of the mouse.

North American Emissions Compliance

United States

This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when this equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his/her own expense.

Canada

This Class (A) digital apparatus meets all the requirements of the Canadian Interference-Causing Equipment Regulations. Cet appareil numérique de la Classe (A) respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

LX Series Free Programmable Controllers Overview

You can control equipment, such as roof top units, fan coils, heat pumps, ventilator units, and terminal units, with the LX Series Free Programmable Controllers (Figure 1). The LX Series Free Programmable Controller line can be programmed using the LX-Free Programming Wizard or the LX Graphical Programming Interface (GPI) Wizard with Facility Explorer (FX) Workbench software.

LX-Free Programming Wizard

The LX-Free Programming Wizard tool is unique in the controls industry because it combines a user-friendly Graphical User Interface (GUI) with the power and flexibility of a code editor and compiler. The LX-Free Programming Wizard tool uses a simplified version of Beginner's All purpose Symbolic Instruction Code (BASIC) that is custom made to suit control requirements.

LX Graphical Programming Interface (GPI) Wizard

The LX Graphical Programming Interface Wizard tool is a programming tool enabling the building of control sequences by dragging and dropping block objects and then linking the objects with a simple click, select, and release. With a user-friendly interface and intuitive programming environment, GPI makes Heating, Ventilating, and Air Conditioning (HVAC) programming easier than ever.

LX-Scheduler Wizard

The LX-Scheduler Wizard allows you to easily configure a weekly-based schedule and a special day schedule for holidays. Easily add and remove the special day event into the calendar by a simple click of the mouse.

North American Emissions Compliance

United States Emissions Compliance

Compliance Statement (Part 15.19)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and*
- 2. This device must accept any interference received, including interference that may cause undesired operation.*

Warning (Part 15.21)

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Canadian Emissions Compliance

Industry Canada Statement

*The term **IC** before the certification/registration number only signifies that the Industry Canada technical specifications were met.*

*Le terme « **IC** » précédant le numéro d'accréditation/inscription signifie simplement que le produit est conforme aux spécifications techniques d'Industry Canada.*
